Colecția SINTRA DUO

Colecția SINTRA reprezintă o soluție perfectă pentru reducerea costurilor de energie.

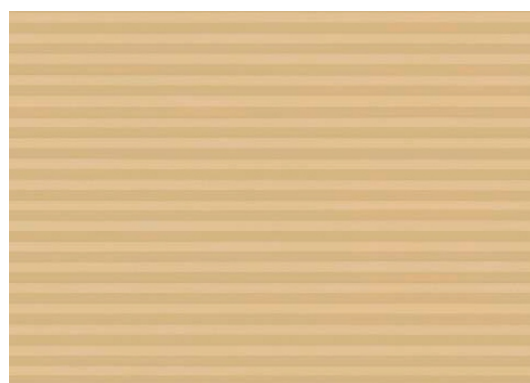

Fiecare fagure are o pernă de aer, care acționează, în funcție de sezon, ca un tampon rece în fața căldurii sau, atunci când sunt utilizate în mod corespunzător, au funcții suplimentare izolatoare.

Pliseele sunt produse moderne ce pot acoperi practic orice suprafață posibil constructivă a unei ferestre sau uși, aici fiind incluse chiar și geamurile în formă de triunghi, trapez, cerc sau semicerc.

Pliseele se prezintă sub forma unor evantaie textile, dând o notă de personalitate în plus ferestrei și camerei tale.

Foarte utile în spații înguste, ca și jaluzelele orizontale din aluminiu sau PVC, se montează pe rama geamului sau între baghetele tâmplăriei din PVC, AL sau lemn, asigurând atât intimitatea căminului dvs., cât și protecție împotriva soarelui.

Pliseele sunt ideale pentru acoperirea ferestrelor în cazul în care protecția UV este o prioritate.

În comparație cu alte metode de umbrire a ferestrei, acestea sunt deosebit de eficiente în blocarea razelor ultraviolete.

Pliseele sunt tratate antistatic, așadar nu necesită curățire în mod regulat.

IMPORTANT!

Pentru modul de întreținere al materialelor, consultați tabelul de mai sus.

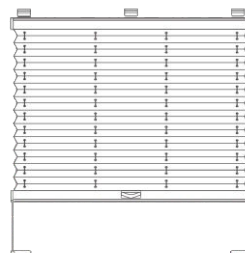

Materialele care se curăță umed sunt recomandate pentru spații cu umezeală mai mare (ex: baie).

TIPURI DE PLISEE

- plisee translucid (50% transparentă)
- plisee dim-out (75% opacitate)
- plisee black-out (100% opacitate) - de un tip special, croite cu fir de aluminiu la exterior, reflectând atât lumina, cât și căldura, fiind astfel ideale pentru crearea unui ambient răcoros.

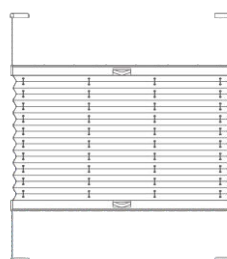

1. Model VS1

Pliseele de tip VS1 se fixează sus, iar deschiderea se face doar din partea de jos.

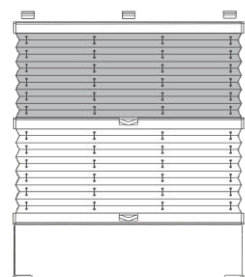

2. Model VS2

Pliseele de tip VS2 pot fi deschise de sus și de jos.

3. Model VS3

Pliseele de tip VS3 se fixează sus, iar deschiderea se face doar din partea de jos. Se pot adăuga 2 materiale diferite.

CULORI DISPONIBILE PENTRU RAME: Alb, Argintiu, Antracit, Negru

ACCESORII PLISEE		PREȚ
Set colțar de baghetă + capac mascare (2 buc/set)		54 ron
Set clemă prindere + capac mascare		37 ron
Set clemfix metallic + imbus		77 ron
	L 50 cm	199 ron
	L 100 cm	239 ron
	L 150 cm	266 ron
	L 200 cm	299 ron

Prețul final se calculează în funcție de:

- dimensiunile modelului de sistem VS1, VS2 (L x H) și
- grupa de preț a materialului (Pg0, Pg1, Pg2, PG 3, PG 4 - vezi detalii pe etichete).

Prețurile afișate includ TVA și sunt valabile pentru toate modelele de sisteme, cu excepția VS3, diferența fiind făcută de dimensiune și grupa de material.

Modelul VS3 include 2 rânduri de material, deci prețul acestui model se calculează dublând prețul de listă.

Modelul VS2 se poate produce cu lățimea de maxim 150 de cm.

Materialurile din grupa PG4 pot fi utilizate doar pt. modelele VS1 și VS2.

1. Prindere standard în interiorul geamului*

Pentru pliseele simple dimensiunile pt. comandă se măsoară din baghetă în baghetă, ca în schița atașată. Nu se includ dimensiunile baghetei, doar dimensiunea sticlei.

Dimensiunea finală a pliseului:

Lățimea = lățimea sticlei din bagheta din stânga până în bagheta din dreapta.

Înălțimea = înălțimea sticlei din bagheta de jos până în bagheta de sus.

* montaj pentru toate modelele VS1, VS2 și VS3 - se comanda la montaj - CLEME CU CAPAC (Papucei)* de sus.

Atentie !!! Dacă rama/baghetă este mai mică de 1.5 cm, NU se poate realiza acest montaj, iar pliseele se vor monta pe ramă. Pentru acest montaj trebuie să verificați că bagheta/rama de geam pe care se montează este dreaptă*.

*Pentru ferestre atipice cu baghetă/ rama rotunjită, se poate comanda separat un ADAPTOR pentru papucel care permite prinderea papucelului de rama rotunjită.

2. Prindere aplicată pe ramă geam fix*

Pentru pliseele cu sistem de prindere aplicată, dimensiunea finală a pliseului se măsoară astfel:

Lățimea = STICLA INCLUSIV BAGHETE

Înălțimea = STICLĂ + RAMĂ (de la mijlocul ramei geamului de sus până la mijlocul ramei de jos)

Atentie !!! Se poate face și mai lat peste ramă și în lățime, dar să nu depășească mânerul geamului.

* se comandă la montaj - COLȚ BAGHETE (aceste baghete se pot folosi și la montare în colțuri pentru rame speciale, rotunde etc)

3. Prindere aplicată pe rama geamului*

ATENȚIE! Sistemul clemfix se folosește doar pentru ferestre mobile!

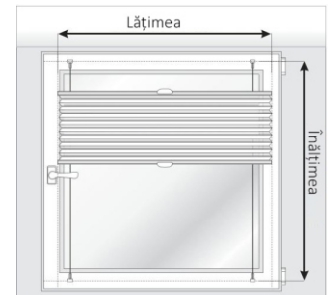

Pentru pliseele cu sistem de prindere clemfix dimensiunea finală se măsoară astfel:

Dimensiunea finală a pliseului:

Lățimea = STICLA INCLUSIV BAGHETE

Înălțimea = STICLĂ + RAMĂ (de la mijlocul ramei geamului de sus până la mijlocul ramei de jos)

*se comanda la montaj - CLEMFIX metalic

4. Prindere aplicată pe perete*

Pentru pliseele cu sistem de prindere aplicată pe perete dimensiunea finală de comandă a pliseului se obține măsurând:

Lățimea = lățimea dorită care să acopere fereastra;

Înălțimea = înălțimea dorită care să acopere fereastra (atenție dacă aveți pervaze ieșite în afară, să nu depășească înălțimea pervazului).

*se comanda la montaj - CLEME de PRINDERE

INFORMATII necesare pentru COMANDA:

1. Tip fereastra normal/inclinat
2. Material rama fereastra (lemn, pvc, metal etc)
3. Model deschidere și aplicare pliseu
4. Dimensiuni geam și/sau dimensiuni finale LXH
5. Material dorit și cod
6. Tip/mod prindere
7. Accesorii de prindere*
