**EXTRA COMFORT WITH MATTRESS TOPPER**

The spring system, working together with an additional spring layer, provides the support and firmness balance needed according to individual body weight. It offers body conformity and balance based on the user's body structure. Your mattress adapts to you, prioritizing your comfort.

**FIRM FOAM**

It is a type of foam that is durable, resistant to sagging, and not produced with fiber that may cause bacterial formation. Featuring these three essential qualities, our firm foams can be used in many areas, from upholstery cushion production to mattress manufacturing.

**BREATHABILITY-ENHANCING CAPSULES**

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

**PERFECT SUPPORTIVE COMFORT**

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

**COMFORTABLE SLEEP AT THE IDEAL TEMPERATURE**

Thanks to the technology used in the mattress, the feeling of sweating is minimized while special climate control ensures air circulation within the mattress. During sleep, it detects temperature changes caused by you or by external factors such as room temperature, duvet, or seasonal conditions, absorbing excess heat in the summer and distributing it across the mattress surface.

Ideal Spinal Support for Different Body Types – Roll Pack Design

The mattress is developed to provide perfect adaptation to different body types and sleeping habits, offering personalized sleeping comfort with its pocket spring system. With its unique ergonomics that fully support the spine, it helps you start a new day feeling rested and refreshed. Designed as a Roll Pack and easy to set up, it also delivers a soft and comfortable sleep experience thanks to its knitted fabric.

Thanks to its specially designed Ultra Edge perimeter support springs, it distributes its high level of comfort across the entire mattress surface, providing uninterrupted comfort that is not affected by movement during sleep. With its pocket spring technology offering full spinal support and its knitted fabric, the mattress creates a comfortable and healthy sleep experience suitable for all body types.

Breathable Surface Ideal Sleep Temperature with Cotton Surface

Extra Spinal Support with Comfort Pad Supporting the body's natural spinal curve throughout the night with its spring system, the mattress provides extra comfort thanks to its specially designed comfort pad.

The breathable structure of the natural bamboo fibers in its fabric creates a healthy and clean sleeping environment, while the natural cotton layer, which helps balance body temperature, prevents sleep interruptions caused by temperature changes.

Thanks to the modern sleep technologies used in its design, the mattress offers single-sided use and maintains its original form for many years, maximizing sleep comfort.

# LEONARDO

### ULTRA-STRONG SPRING SYSTEM

The spring system used in the mattresses is designed to achieve the perfect balance of shape, durability, flexibility, and performance. Through precise heating and cooling processes during production, it results in high-performance, long-lasting products.

### SOFT FOAM

The soft orthopedic mattress is made with a special foam produced from a blend of Polyol and TDI raw materials applied over specialized spring systems. It is typically quilted with cotton fabric and encased in a cover, offering a medium-firm feel.

### BREATHABILITY CAPSULES

Thanks to the air channels on the surface, it enhances air circulation and helps prevent sweating.

### ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

### WASHABLE TOPPER SYSTEM

Unlike other mattresses, the topper on the Leila mattress is removable and suitable for dry cleaning. This mattress not only provides a stress-free and healthy sleep but also offers extra ease of use.

Thanks to its special feather-effect springs, the mattress provides personalized support regardless of your body profile or sleeping habits. Imagine a smart system that instantly adapts to your body's every movement.

Manufactured with Viscojell technology, the mattress features a spring and foam configuration that responds more intelligently compared to conventional Bonnell springs. It adapts to all body profiles and sleeping positions, providing optimal conformity to body movements during sleep. With Viscojell technology, it also delivers personalized thermal comfort, becoming a mattress tailored specifically to you.

**EXTRA COMFORT WITH MATTRESS TOPPER**

The spring system, working together with an additional spring layer, provides the support and firmness balance required according to individual body weight. It offers body conformity and balance based on the user's body structure. Your mattress adapts to you, prioritizing your comfort.

**FIRM FOAM**

It is a type of foam that is durable, resistant to sagging, and not manufactured with low-quality fiber that may cause bacterial formation. Featuring these three essential qualities, our firm foams can be used in many areas, from upholstery cushion production to mattress manufacturing.

**BREATHABILITY CAPSULES**

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

**PERFECT SUPPORTIVE COMFORT**

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

**COMFORTABLE SLEEP AT THE IDEAL TEMPERATURE**

Thanks to the technology used in the mattress, the feeling of sweating is minimized, while a special climate control system ensures air circulation within the mattress. During sleep, it detects temperature changes caused by you or by external factors such as room temperature, duvet, or seasonal conditions, absorbing excess heat in summer and distributing it evenly across the mattress surface.

Featuring an ultra comfort mattress comfort layer on its top surface, it offers a deep and uninterrupted sleep experience. Thanks to its high density, it accommodates a wide weight range and provides maximum support for the body even at higher weights.

The open-cell structure of the viscoelastic material and the special foams used in the support layer ensure effective air circulation.

The mattress height is 34 cm (±1 cm). It is covered under warranty.

It helps maintain the natural posture of your spine throughout the night, just as during the day.

It reduces body pressure and promotes healthy blood circulation.

The internal support layer, with its special cutting design, perfectly adapts to different pressure points such as the head, shoulders, back, waist, and hips, helping your spine remain in the correct position.

**EXTRA COMFORT WITH MATTRESS TOPPER**

The spring system, working together with an additional spring layer, provides the support and firmness balance required according to individual body weight. It offers body conformity and balance based on the user's body structure. Your mattress adapts to you, prioritizing your comfort.

**FIRM FOAM**

It is a type of foam that is durable, resistant to sagging, and not manufactured with low-quality fiber that may cause bacterial formation. Featuring these three essential qualities, our firm foams can be used in many areas, from upholstery cushion production to mattress manufacturing.

**BREATHABILITY CAPSULES**

Thanks to the air channels on the surface, it enhances air circulation and helps prevent sweating.

**PERFECT SUPPORTIVE COMFORT**

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

**COMFORTABLE SLEEP AT THE IDEAL TEMPERATURE**

Thanks to the technology used in the mattress, the feeling of sweating is minimized, while a special climate control system ensures air circulation within the mattress. During sleep, it detects temperature changes caused by you or by external factors such as room temperature, duvet, or seasonal conditions, absorbing excess heat in summer and distributing it across the mattress surface.

Mattress Firmness Level

5-Zone Support for the Entire Body

The 5-zone pocket spring system provides targeted support to five different areas of the body with independently operating springs of varying firmness, ensuring personalized adaptation to your body structure. Thanks to the pocket spring system, it prevents partners from being affected by each other's involuntary movements during sleep, creating a more comfortable sleeping environment.

Featuring 60 DNS viscoelastic foam produced with space technology on both surfaces, the mattress helps improve blood circulation and prevents waking up feeling tired. Thanks to its fabric with Fresh technology, which provides long-lasting hygiene, it prevents the formation of unpleasant odors. With its double-sided design for summer and winter use, you can enjoy your mattress for many years. The fabric used on the winter side and the cotton used on the summer side ensure the same level of comfort in every season.

Spring Warranty Period: 10 Years  
Filling Warranty Period: 4 Years

Bed Dimensions	90x190 cm	140x200 cm	160x200 cm	180x200 cm

**MARQUEZ**

**BONNELL SPRING SYSTEM**  
Bonnell spring mattresses are constructed with interconnected springs that are attached to one another, using both springs and foam as materials.

**BREATHABILITY CAPSULES**  
Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

**HIGH-DENSITY FOAM**  
High-density foams are more elastic and more durable than low-density foams. Even if two foams with the same firmness level provide a similar feel, there is no doubt that the high-density foam will last much longer without sagging.

**ORTHOPEDIC SURFACE**  
A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

**WASHABLE TOPPER SYSTEM**  
Unlike other mattresses, the topper is removable and washable.

For Allergy Concerns  
With Natural Content  
With its high-resilience Feather Spring Technology, the mattress maintains its shape for many years without deformation. The mattress balances body temperature with moisture-absorbing, cooling cotton on the summer side and a warm fabric on the winter side, ensuring comfort in every season.

### STRONG SPRING SYSTEM

The spring system used in the mattresses is designed to achieve the perfect balance of shape, durability, flexibility, and performance. Through precise heating and cooling processes during production, it results in high-performance and long-lasting products.

### HIGH-DENSITY FOAM

High-density foams are more elastic and more durable than low-density foams. Even if two foams with the same firmness level provide a similar feel, there is no doubt that the high-density foam will last much longer without sagging.

### BREATHABILITY CAPSULES

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

### ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

Thanks to the special spring system used inside the mattress, it offers twice as many springs and significantly more comfort compared to ordinary mattresses. Its Brown fabric absorbs body heat and helps maintain temperature balance.

A specially cut foam is used within the thick topper layer. In addition, the edge support foams used around the mattress help it maintain its shape for a long time.

The pull-tight edge design and special side materials ensure proper air circulation, while the double-layer spring system inside provides the comfort of dual spring support.

Featuring Brown technology, the soft-touch knitted fabric, with its thermal conductivity, provides an ideal sleep experience in all four seasons.

## POCKET SPRING SYSTEM

In the pocket (encased) spring system, springs of different diameters are individually wrapped in fabric according to the desired firmness of the mattress and operate independently from one another. With wires arranged for five different body zones and springs of varying firmness levels, different pressure is applied to multiple points of the body.

## SOFT FOAM

Produced from a special blend of Polyol and TDI materials applied over specialized spring systems, this foam is typically quilted with cotton fabric and encased in a cover. The result is a medium-firm, soft orthopedic mattress.

## BREATHABILITY CAPSULES

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

## ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

## WASHABLE TOPPER SYSTEM

Unlike other mattresses, the topper is removable and suitable for dry cleaning. This mattress not only provides a stress-free and healthy sleep but also offers extra ease of use.

The mattress, featuring a spring system formed by the pocket springs in its core and incorporating some of the world's finest pocket spring technologies, instantly detects all points of the body that come into contact with the surface and provides perfect support.

Its continuously responsive springs and award-winning spring technologies ensure high breathability and exceptional comfort.

# MANET

Memory American Spring System That Fully Embraces the Body

Breathable Structure That Prevents Sweating

Extra Comfort with Special Spring Design

It combines the exceptional comfort of Visco technology with advanced spring technology.

Manufactured in collaboration with one of the world's leading spring technology experts, this mattress delivers the unique body-contouring feature of Visco foam together with the world's first memory spring technology. This spring system perfectly adapts to the body's convex areas such as the head, neck, waist, and hips, while responding instantly to body movements to provide the same level of comfort for different body types.

The small-diameter, fine-wire springs enhance the body-embracing effect, transforming it into superior comfort while creating greater air circulation compared to conventional Visco foams. As a result, the mattress breathes more effectively and ensures a more comfortable sleep.

The Feather-engineered UltraComfort lumbar support system provides extra support to the lower back and hip areas, offering personalized lumbar support regardless of body mass index or body profile.

### EXTRA COMFORT WITH MATTRESS TOPPER

The spring system, working together with an additional spring layer, provides the support and firmness balance required according to individual body weight. It offers body conformity and balance based on the user's body structure. Your mattress adapts to you, prioritizing your comfort.

### FIRM FOAM

### WASHABLE TOPPER SYSTEM

Unlike other mattresses, the topper is removable and suitable for dry cleaning. This mattress not only provides a stress-free and healthy sleep but also offers extra ease of use.

Manufactured with Ultra Comfort technology, this mattress helps support the regeneration of your body's energy. By incorporating this technology into mattress production, it aims to enhance overall comfort and relaxation. When infrared rays penetrate the body, they help you feel more energetic and healthier.

Ultra Comfort technology regulates blood circulation and optimizes body temperature. Improved circulation helps reduce fatigue, the appearance of cellulite, and cold sensations in the hands and feet.

Warranty Period: 5 Years - Covered under warranty.

Ultra Comfort technology also enhances endurance, muscle strength, and athletic performance, while supporting the body's recovery process during sleep.

Mattresses produced with this technology help renew and restore the body, recharging it with vital energy.

## HERCULES SPRING SYSTEM

It consists of springs that operate independently from one another. The weight placed on a single spring has almost no effect on the others. With even the slightest movement of your body, each spring works independently, so you barely feel your partner turning in bed.

## HIGH-DENSITY FOAM

High-density foams are more elastic and more durable than low-density foams. Even if two foams with the same firmness level provide a similar feel, there is no doubt that high-density foam will last much longer without sagging.

## BREATHABILITY CAPSULES

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

## ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

Wake up feeling completely rested.

With its high-durability spring system reinforced with an increased carbon alloy, the mattress provides strong body support. The ultra comfort form foam in the top pad fills the body's natural contours for enhanced comfort.

During sleep, it helps maintain the natural structure of the spine and provides firm support for a restorative rest. In addition, thanks to KeS technology, it helps prevent the formation of unpleasant odors.

## Mattress Firmness Level

# COURBET

**BONNELL SPRING SYSTEM**  
Bonnell spring mattresses are constructed with interconnected springs, using both springs and foam as materials.

**FEATHER FOAM**  
Feather foam has a very soft and flexible structure. It provides a gentle initial touch, and with its soft, silky texture, helps prevent pressure on the skin under body weight. By balancing the pressure applied to the body, it minimizes involuntary turning movements during sleep.

**BREATHABILITY CAPSULES**  
Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

**ORTHOPEDIC SURFACE**  
A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

**WASHABLE TOPPER SYSTEM**  
Unlike other mattresses, the topper is removable and suitable for dry cleaning. This mattress not only provides a stress-free and healthy sleep but also offers extra ease of use.

**FEATHER FOAM TECHNOLOGY** provides high comfort and high breathability.

It offers the advantage of dual-sided use, with one side soft and the other firm. Thanks to the feather foam divided into 5 zones, it delivers unique comfort.

To ensure superior comfort, a special combination of different foams has been used in its design.

Feather foam features a honeycomb surface structure and a flexible, highly elastic composition. This structure supports the body at every point, enhances comfort through improved air permeability, provides the feel of a spring mattress during movement at night, and helps create targeted firmness zones.

A removable and washable knitted mattress cover is used.

### ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

An innovative mattress specially developed with Feather Technology to provide optimal support for the back and lower back-ideal for those who prefer a firm sleeping surface.

With its special spring system, it offers a firmer and stronger mattress surface that embraces the body and delivers proper support. Despite its firm feel, its orthopedic structure remains uncompromised. The zoned body suspension system provides targeted support to the shoulders, hips, and joints, helping reduce fatigue. Its comfort-enhancing topper adds extra relaxation.

Thanks to its breathable fabric structure, it promotes relaxation, soothes the heartbeat, and helps balance body temperature. With its Feather-specific spring technology and other superior features, it brings a new perspective to firm mattress preferences and elevates sleep quality even further.

# EDGAR

### BONNELL SPRING SYSTEM

Bonnell spring mattresses are constructed with interconnected springs, made using both springs and foam as materials.

### BREATHABILITY CAPSULES

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

### HIGH-DENSITY FOAM

High-density foams are more elastic and more durable than low-density foams. Even if two foams with the same firmness level provide a similar feel, there is no doubt that high-density foam will last much longer without sagging.

### ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

Four-Season Use

Natural Content

Featuring a spring system made of specially double-tempered steel springs, this double-sided mattress with its luxurious knitted fabric offers year-round comfort.

With its internal and edge support foams, fully orthopedic structure, and design that provides complete spinal support, it is ideal for those seeking economical, long-lasting comfort.

# HADID

What the human body - exposed to stress and fatigue throughout the day - truly needs to rest and renew itself is nothing more than healthy sleep. Inspired by this fact, we have developed a fabric with anti-stress and anti-static properties to help eliminate stress and negative energy from the body. Supporting the renewal of both body and mind during sleep, this fabric invites users not just to sleep each night, but to a therapeutic experience.

Thanks to its specially engineered top fabric, it helps the body release stress while also reducing the buildup of static electricity.

All springs are interconnected in a helical structure. This allows them to move simultaneously and with equal resistance, preventing deformation. Its lightweight structure gives you the feeling of lying on clouds. The unique spring form expands the surface area, resulting in highly efficient springs. During a good night's sleep, the support and comfort provided by the springs encourage natural sleep movements that help relax the muscles.

Presented with a knitted mattress fabric, plush quilted layers, and high-density edge support foam, the mattress combines comfort with refined aesthetics. Embroidered labels, piping, and coordinated edge layer colors create visual richness. The soft-touch knitted fabric, square-pattern embroidery design, and modern line details on the top fabric particularly appeal to younger consumers.

### BONNELL SPRING SYSTEM

Bonnell spring mattresses are constructed with interconnected springs, made using both springs and foam as materials.

### BREATHABILITY CAPSULES

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

### HIGH-DENSITY FOAM

High-density foams are more elastic and more durable than low-density foams. Even if two foams with the same firmness level provide a similar feel, there is no doubt that high-density foam will last much longer without sagging.

### ORTHOPEdic SURFACE

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

# MURILLO

### ULTRA-STRONG SPRING SYSTEM

The spring system used in the mattresses is designed to achieve the perfect balance of shape, durability, flexibility, and performance. Through precise heating and cooling processes during production, it results in high-performance and long-lasting products.

### HIGH-DENSITY FOAM

High-density foams are more elastic and more durable than low-density foams. Even if two foams with the same firmness level provide a similar feel, there is no doubt that high-density foam will last much longer without sagging.

### BREATHABILITY CAPSULES

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

### ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

### Extra Comfortable Sleep

With thermal technology that regulates your body temperature during sleep, heat is temporarily stored when body and ambient temperature rise, and released when the temperature drops.

The extra comfort topper supports the spine. The topper layer, partially separated from the springs, provides a softer surface feel thanks to its thick foam structure. Your mattress offers both the durability of springs and the comfort of a thick foam layer.

Experience Extra Comfort with the Comfort Topper

The high-density foam used in the topper supports the spine, and the increased foam thickness enhances overall comfort. The topper layer, partially separated from the springs, creates a softer sleeping surface due to its thick foam composition. Your mattress combines the resilience of springs with the comfort of a thick foam layer.

**DONATELLO**

**ULTRA-STRONG SPRING SYSTEM**  
The spring system used in the mattresses is designed to achieve the perfect balance of shape, durability, flexibility, and performance. Through precise heating and cooling processes during production, it results in high-performance and long-lasting products.

**BREATHABILITY CAPSULES**  
Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

**ORTHOPEDIC SURFACE**  
A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

**SOFT FOAM**  
Produced from a special blend of Polyol and TDI materials applied over specialized spring systems, this foam is typically quilted with cotton fabric and encased in a cover. The result is a medium-firm, soft orthopedic mattress.

**WASHABLE TOPPER SYSTEM**  
Unlike other mattresses, the topper is removable and suitable for dry cleaning. This mattress not only provides a stress-free and healthy sleep but also offers extra ease of use.

Thanks to its special Feather springs, the mattress provides personalized support regardless of your body profile or sleeping habits.

Imagine a smart system that instantly adapts to your body's every movement.

With its spring and foam configuration, it responds more intelligently than conventional Bonnell spring mattresses. It adapts to all body profiles and sleeping positions, providing optimal conformity to body movements during sleep.

**ORTHOPEDIC SURFACE**  
A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

Thanks to its Easy Bird feature, it has water-repellent and oil-repellent properties. With Easy Bird technology, your mattress remains as clean and hygienic as on the first day.

With its new-generation special spring design that provides double support to your body, the mattress allows you to instantly feel comfort during sleep.

In addition to offering unique comfort with its distinctive spring system, it adapts to every body type thanks to the working principle of its springs. Providing the most suitable sleep environment with its smart adaptation technology, it delivers ideal support to the shoulders, hips, and joints through its body suspension system, helping reduce fatigue.

## EXTRA COMFORT WITH MATTRESS TOPPER

The mattress topper provides an enhanced sense of comfort. It delivers a refreshing sleep experience while offering additional body support. Enjoy uninterrupted and comfortable sleep.

## MINI POCKET SPRING SYSTEM

One of the key advantages of the Mini Pocket spring system, placed within various layers, is its ability to provide individualized support throughout the night according to different weights, heights, and sleeping positions. It minimizes motion transfer between partners during sleep. The Mini Pocket spring system increases the mattress's durability while elevating and deepening the comfort level. With this spring structure, your spine is better

## BREATHABILITY CAPSULES

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

## ORTHOPEDIC SURFACE

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

## Mattress Firmness Level

The Feather Mattress is designed with inspiration from nature and technology.

With components such as pocket springs, mini pocket springs, silk, and fabric made from natural cotton, it creates a comfort zone that "remembers" and supports you. It is designed for single-sided use. By adapting to your most comfortable sleeping position, it creates a personalized and relaxing sleep environment.

Featuring one of the world's finest fabrics, with fine fibers, moisture-absorbing and long-lasting properties, it stands out for its muscle-relaxing effect, breathability for the skin, and ability to provide an ideal temperature in every season. Cotton, on the other hand, balances moisture, reduces sweating, tends to keep microbes and bacteria away, and offers durability - promising comfortable and healthy sleep.

With these hypoallergenic natural materials, comfortable sleep stays with you.

### EXTRA COMFORT WITH MATTRESS TOPPER

The spring system, working together with an additional spring layer, provides the support and firmness balance required according to individual body weight. It offers body conformity and balance based on the user's body structure. Your mattress adapts to you, prioritizing your comfort.

### SOFT FOAM

Produced from a special blend of Polyol and TDI materials applied over specialized spring systems, this foam is typically quilted with cotton fabric and encased in a cover. The result is a medium-firm, soft orthopedic mattress.

### BREATHABILITY CAPSULES

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

### PERFECT SUPPORTIVE COMFORT

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

### COMFORTABLE SLEEP AT THE IDEAL TEMPERATURE

Thanks to the technology used in the mattress, the feeling of sweating is minimized, while a special climate control system ensures air circulation within the mattress. During sleep, it detects temperature changes caused by you or by external factors such as room temperature, duvet, or seasonal conditions, absorbing excess heat in summer and distributing it across the mattress surface.

Enhanced comfort, restorative sleep.

The mattress is a comfortable design created by combining high-technology materials. The Light Spring Technology, developed exclusively for Feather, consists of two different spring systems. In the lower layer, a high-durability spring system reinforced with an increased carbon alloy supports the body.

In the upper layer, Pocket Spring Technology provides targeted support to each area of the body according to its needs.

The superior elasticity of the Feather foam, which forms its hybrid structure, fills the body's natural contours. The result is exceptionally comfortable orthopedic support.

### EXTRA COMFORT WITH MATTRESS TOPPER

The spring system, working together with an additional spring layer, provides the support and firmness balance required according to individual body weight. It offers body conformity and balance based on the user's body structure. Your mattress adapts to you, prioritizing your comfort.

### FIRM FOAM

It is a type of foam that is durable, resistant to sagging, and not manufactured with low-quality fiber that may cause bacterial formation. Featuring these three essential qualities, our firm foams can be used in many areas, from upholstery cushion production to mattress manufacturing.

### BREATHABILITY CAPSULES

Thanks to the air channels on the surface, it increases air circulation and helps prevent sweating.

### PERFECT SUPPORTIVE COMFORT

A support system that fully adapts to your spine and body contours, helping maintain a healthy, orthopedic posture of the musculoskeletal system even while lying down.

### COMFORTABLE SLEEP AT THE IDEAL TEMPERATURE

Thanks to the technology used in the mattress, the feeling of sweating is minimized, while a special climate control system ensures air circulation within the mattress. During sleep, it detects temperature changes caused by you or by external factors such as room temperature, duvet, or seasonal conditions, absorbing excess heat in summer and distributing it across the mattress surface.

### Mattress Firmness Level

### Personalized Comfort

For Lower Back, Neck, and Back Problems

High Comfort for Couples

Thanks to the independently operating pocket spring system, it provides targeted support for different areas of the body. The zoned body suspension system delivers the necessary support to the shoulders, hips, and joints, helping to reduce fatigue. At the same time, 5-Zone Technology minimizes motion transfer caused by your partner's involuntary movements during sleep, ensuring uninterrupted rest.

With its Roll Pack design, it is practical and quick to set up while offering a comfortable sleep experience.
